

Student Assistants Needed

The Visualization Research Center of the University of Stuttgart (VISUS) is looking for

3 student assistants (m/f/d)

to support the research of a disabled employee (work assistant for a person with disabilities)

Work Description:

As a work assistant for a person with a walking disability, you support them in activities of research that would not be physically possible, such as setting up user studies, technical setup for teaching, transporting equipment, accompanying them on long journeys on campus and to events, etc.

Requirements:

- Dependability and willingness to work closely together with someone
- No fear of pushing wheelchairs and carrying equipment
- Some flexibility regarding your working hours ; the working hours are scheduled according to the current need of the disabled employee;
- Ideally you are a Computer Science student or similar with an interest in HCI and VR AR, technologies (no prior knowledge required though), but students of other faculties are welcome as well for the assistance part
- Ideally, you live close to campus, but it is not strictly necessary
- Fluency in German or English

However, the most important thing about an assistance job, where you work closely together with someone, is to get along well.

Female* students and students with disabilities are strongly encouraged to reach out if fitting the criteria above and can help with the activities mentioned.

Working Hours: Depending on the agreement, up to approx. 15 h/month, flexible allocation depending on agreement and requirements

Begin: Starting Now
